

FreedomLift

FreedomLift was founded in 2001 by Gregory F. Vogel and Robert C. Zwiers to bring a new Best in Class Tender Management Solution to the boating marketplace. Their goal was to provide a new and exciting solution to carry tenders or Personal Water Craft (PWC). Their initial design, development and prototyping was carried out on a Sea Ray 50 Sundancer and once complete, the product was so advanced and unique that it was awarded North American patents in both the United States and Canada.

Before the FreedomLift, options in the marketplace were expensive, heavy, unreliable, poorly designed, and often had a high failure rate. The FreedomLift revolutionized customer's ability to carry

their tender with a lighter system that features Removable Lift Arms and elevates the tender much higher above the water providing safety from rough sea conditions including following seas which often result in tenders being swamped and lost using low platform style lifts. Additionally, through advanced computer aided design/build, the

FreedomLift is custom made to fit virtually any inboard, Zeus, or IPS driven boat. No more one size fits all!

Also, through the use of special marine alloys, the FreedomLift significantly reduces system weight while at the same time delivers the strongest system in the marketplace. This combination provides customers with class leading reliability.

ENJOY THE FREEDOM TO...

- Transport and use your tender when and where you want – with just the touch of a button!
- Operate your yacht without the hindrance of bulky, cumbersome and unsightly lift parts.
- Remove the Lift Arms when not carrying your tender.
- Have more fun and work less!

FreedomLift strives to establish long term relationships with their clients and provides uncompromising customer service and support. The FreedomLift team has committed themselves to provide the absolute best Tender Management System at any price. They would welcome the opportunity for you to join the FreedomLift family!

What Makes FreedomLift the Best Choice?

- Only system with Removable Lift Arms
- Best in Class Lifting Range 44" (112 cm)
